

Zhaojun Xie

College Park, MD | zxie12@umd.edu | [linkedin.com/in/zhaojun-xie](https://www.linkedin.com/in/zhaojun-xie)

EDUCATION

University of Maryland, College Park

M.S. in Computer Science

College Park, MD

Sep 2025 – May 2027

University of Maryland, College Park

B.S. in Computer Science, Minor in Business — GPA: 3.88/4.0

College Park, MD

Aug 2021 – May 2025

Relevant Coursework: Algorithms, Java OOD, Computer Systems, Discrete Structures, Organization of Programming Languages, Advanced Data Structures, Databases Design

EXPERIENCE

Tech Fellow

Codepath

May 2024 - Present

Remote

- Mentored and supported 4-5 student groups in Python-based data structures and algorithms,
- Provided technical guidance and problem-solving strategies to improve their problem-solving abilities.
- Enhanced course material for over 200 students, collaborating with CodePath staff to optimize learning strategies.

Undergraduate Teaching Assistant

University of Maryland

Jan 2025 - May 2025

College Park, MD

- Provided instructional support to students on SQL/MongoDB projects and homework through weekly office hours
- Collaborated with the professor and fellow TAs to optimize experiences and enhance course qualities for 194 students
- Graded assignments, projects, and exams efficiently and accurately with fairness and consistency.

Undergraduate Research Assistant

University of Maryland

Sep 2023 - May 2024

College Park, MD

- Developed Python scripts leveraging the Hugging Face pipeline to automate action generation for LLM.
- Integrated multiple LLM APIs (StarCoder, CodeLlama, and Gemini) to systematically generate parallel codes for analysis.
- Analyzed the performance of LLMs in code translation, increasing usability by optimizing workflow integration.
- Co-authored a research paper evaluating LLMs in generating parallel code, published by UMD.

PROJECT

Poker Card Matching Game | Kotlin

[Github](#)

- Designed game mechanics involving card matching logic, user score tracking, and game state persistence
- Integrated user authentication and Google Mobile Ads, using Google AdMob to ensure proper ad load handling.
- Implemented email verification using a custom EmailService, employing coroutines to handle tasks for smooth gameplay.
- Utilized Kotlin coroutines to enhance app responsiveness, reducing latency and improving overall performance by 25%.

Machine Learning/Data Analysis | Python, Numpy, Pandas

- Applied Scikit-learn functionalities for tasks like data preprocessing, splitting, and model evaluation.
- Engineered supervised learning algorithms such as Classification, Regression, Neural Networks, and Random Forests.
- Designed solutions for grade computation, encompassing data organization, summary generation, and statistical analysis.

Full Stack Web Application | HTML, CSS, Javascript, React.js, Node.js

- Managed end-to-end deployment, enabling real-time data access and reducing page load times by 15%
- Developed a dynamic web, improving content delivery through optimized React.js Hooks and async/await API integration.
- Employed a full stack approach utilizing HTML, CSS, JavaScript, React.js, Node.js, and RESTful API architecture.

SKILLS&CERTIFICATION

Languages: **Java, Python, Kotlin**, C/C++, Javascript, SQL, Ruby, Typescript, HTML/CSS, Rust, MATLAB, MIPS

Frameworks/Libraries: React, Node.js, pandas, NumPy, Matplotlib

Tech/Tool: Git, VS Code, Visual Studio, HuggingFace, Unity, Eclipse, PyCharm, IntelliJ

Certifications: CodePath Technical Interview Prep, ZEPETO Fellowship Participant
